

REFUSING COVID-19 VACCINES

You Have Options

This information is given under the authority of freedom of speech based on the First Amendment to the Constitution of the United States. The data provided is for information purposes and you are encouraged to seek qualified legal counsel in your area of concern as well as follow the proper legal channels.

Unfortunately, because the federal government has implemented the PREP Act and several states have made it illegal or unproductive to sue the vaccine manufacturers and distributors, you may feel like you have no options. But you do have options and we are going to share several with you.

The federal government and the states are protecting the vaccine companies and distributors from liability if you get sick or die after taking the vaccine as many people have. And where there is no liability, there is little or no accountability. So you are going to have to step up to protect yourself.

You have seen the people all around you being manipulated, coerced and frankly forced to take the vaccine for fear of losing their jobs, fear of restricted travel, fear of being unable to attend college and fear of looking out of place as the oddball who is going against the system. The reality is that you are one of the very few people who are thinking for yourself. If you have decided not to take the vaccine, don't worry about the many deceived people around you who took it out of ignorance or fear.

You will have some tough decisions that you have to make and these decisions will call for bold sacrifices that could save your life. And it is an insult that they offer you BS incentives like free donuts and beer and hamburgers and chicken if you will take the vaccine.

Just as others do not want you blocking them from taking the vaccine, likewise they should not be making you take it. If they want you to respect their choices, they are going to have to respect yours. And if the Court will not uphold that, it may be a constitutional violation of equal protection under the law. Do the research. Check with a competent, balanced, honorable attorney.

It is amazing how the same people who will say that a woman's body is her own so she has the right to choose are the same people who will turn around and support mandatory vaccines for your body. Hypocrisy 101.

Apparently the medical and vaccine industry want you to simply ignore all the people who died from the vaccines and accept whatever explanation is given. But apparently they underestimated you because you know something is wrong, you know you are being deceived by the medical and vaccine industry and you know that the vaccines are not safe and effective as so many deceived people believe they are.

If you take the vaccine and any of the **22 dangerous and deadly adverse outcomes projected by the FDA on their own website** happens to you, there may be no coming back. You are being lied to about the numbers of deaths and severe injuries and most people have no idea where to find that information within government documents. You have to get this right.

We have the data available throughout website. Straight from the documents of the FDA, CDC, HHS and vaccine manufacturers themselves. But don't expect to hear any of that truth on the news when the goal of Dr. Fauci and the vaccine companies is to infect as many people as possible with the virus itself, nanotechnology and poison. And yes we have proof of vaccine content. Not conspiracy theory, proof. www.covid19exposed.net

So all that being said, let's get into your options if you have decided to refuse taking the unsafe, ineffective, experimental, unapproved vaccines.

A **Medical Exemption** is one possible option. That will come into play if you would be placed at even more severe of a risk of death or illness by taking the vaccine. Certain medical conditions place you at extreme risk.

A **Religious Exemption** is a second possible option. If you are forced to violate your religious beliefs, you could have grounds for a lawsuit. And that could become a religious rights Constitutional issue on a federal level. So even if those who are a part of your religion or belief system take the vaccine, they can neither speak for your belief nor your interpretation of the doctrines, which reflect your belief.

If you are a student, **Distance Learning, Remote or Virtual Learning** might be an option. You would have to give up the college experience but if

you take the vaccine and die, as some have, you won't have the college experience anyway. Check with your school to see if they offer this as an option to you. Employers can require things of their employees.

That does not mean that an employer can put your life at risk if you can show they are doing just that. That is negligence and could even be criminal negligence. That is a matter for the courts as well. But don't be afraid to take your employer to court. The employers do not have the same level of protection regarding mandatory vaccines as the vaccine companies and those who give you the shot have.

Another option is a **Petition** to stop mandatory vaccines, which could work very well on a college or university campus. Remember nobody has the right to place your life at risk when you won't allow it. That must be your choice, not somebody else's. And if something goes wrong, the employers or schools that made you take the vaccine will refuse to take the blame, leaving you out in the cold. Coercion is very serious and it is a crime. Likewise, retaliation against you is illegal in most states as well. So organize a group of others who refuse to take the vaccine. There is strength in numbers but work fast, boldly and strategically because more restrictions are coming.

Another option is a **Lawsuit**. Or maybe you could seek an **Injunction** from the court to block the enforcement of the mandatory vaccines. A powerful lawsuit requires several people to come together and the courage of attorneys to step up and take the case to court. We really hope there are attorneys somewhere who are awake and not afraid to step up. Find them.

Finally, explore all of your possible options. And you can count on us to provide the documented evidence that these vaccines are unsafe and ineffective. As well as the proof that you are neither being told as much as you need to know to give "informed consent " nor are you being told the truth. **EVEN THE VACCINE RECIPIENT FACT SHEETS LACK VITAL INFORMATION** about vaccine content and possible deadly side effects. We have the fact sheet packages from copies of all 3 vaccine companies and we can prove this claim. Sometimes people getting vaccinated are not even given these documents. All if this can be proven.

Contact us by email through our website if we can help you. But don't let anybody harass, intimidate, threaten or coerce, deceive or manipulate you into doing something you do not want to do that could place your life at risk.

You have options. Use them! So step up, stand up, speak up and spread the word about our website.
