

# **If You Took The Covid-19 Vaccine, Here Is What You Need To Know:**

***This is what the CDC and Federal Government think of you.***

**<https://www.cdc.gov/cpr/zombie/index.htm>**

**<https://www.cnn.com/2014/05/16/politics/pentagon-zombie-apocalypse/index.html>**

What I am about to tell you is not to make you feel stupid. But you have been deliberately deceived by the medical and vaccine industry regarding Covid-19 vaccines. And there are medical doctors who have given us the truth I am about to share with you. This information is provided under the authority of the First Amendment to the Constitution of the United States and is not intended as medical advice for any treatment, therapy or cure.

But keep in mind the information I am about to share with you stands for itself because it has come from the websites and documents of the CDC, FDA, NIH, HHS, Johns Hopkins, Moderna, Pfizer, Johnson & Johnson and regulatory agencies. So if you don't believe the information, I suggest you request documented proof from us via email or check the links we will provide to these agency" information so you can see for yourself. But you are going to have to think for yourself instead of letting the medical and vaccine injuries think for you. And that will be difficult when they have such a comprehensive plan of lies, when media and social media are promoting the lines and when so many people around you have been tricked into or forced to take the vaccines.

A person intensely programmed to believe lies is not likely to even listen to evidence and proof they have been deceived because they don't believe such evidence exists. Everything you are about to hear is fact which can be proven using science, documents and medical doctor testimony. Yes practicing medical doctors. And you can see and hear several of them on our website.

It was so easy for Dr Fauci, the CDC, FDA, HHS and vaccine companies to deceive you because you are not a medical doctor. So rather than even trying to verify what you heard on television, you just blindly believed it. And that, along with the media helping them spread the lies, is how you were deceived.

Tuskegee 2021, as subtle as the serpent in the Garden of Eden but now two snakes wrapped around a stick, and you took it while drinking the Kool-aid, all at the same time. If you took the vaccine (esp. In Georgia), you made a big mistake and here are 15 verifiable reasons why:

1. Cases of vaccine death or severe injury are everywhere but they are being kept out of the news and the public has no idea where to find these cases of vaccine death and injury. So the public only believes what they hear on television. just not making the news. Yet more and more cases are coming out and the CDC is even addressing them as people die from the Covid-19 vaccines. Why do you think J&J trashed 15 million doses that people were scheduled and waiting for? Why do you think the federal government "paused" all J&J vaccines, the same government that told you these vaccines were safe and effective? If the blood clots were so rare and unique to only 6 people, why trash 15 million doses? Think people. Think.

2. Cases of vaccine injury and death are hidden within the reports, databases and payout programs of the CDC, FDA and HHS. The reports and databases are called VAERS, CICIP, VICP and MMWR.

3. Both Johnson & Johnson and Pfizer have a horrible criminal track record of intentionally violating safety regulations which then resulted in the severe injury and deaths of many people even before the pandemic.

4. All three vaccines are worse than Covid-19 itself. You just have not seen much of the science they hid from you so you don't know this. Therefore many of you never bothered to ask what was in these vaccines. And you believed them because you thought the "experts" would know best. But they deceived you. The information from within the CDC, FDA and HHS hidden from you proves the

vaccines are dangerous and killing people. You focused only on what they told you to focus on and be afraid of.

5. Yes the Moderna and Pfizer vaccines tamper with your DNA and infect you with the virus that causes Covid-19. To hide this fact, Moderna used clever wording on their website that says this is true. They call "encoding your system with instructions using their operating system and software of life". This is from the Moderna website. If you can add 2+2, you already know this is just them saying in a different way that they are reprogramming your DNA.

All 3 vaccines infect you with the virus that causes Covid-19. All 3 vaccines contain the spike protein from the Sars-Cov-2 virus which causes Covid-19 in the body. If your immune system can attack the virus they gave you in the vaccine fast enough and strong enough, you will not get Covid-19. But if your immune system can't, you will get Covid-19 just like the 5,800 people who just did.

And while the CDC admitted these people got Covid-19 after taking the vaccine, the same CDC tried to explain it away as they always do because most of you fall for their explanations.

6. So while you MAY NOT get Covid-19 from the vaccine, people ARE getting Covid-19 from the vaccine (5,800 people recently) and it could happen to you.

More and more people are getting COVID-19 just after taking the vaccines and this is not coincidence. But they are not getting tested after taking the vaccine so they don't realize they are infected and contagious. Right now, if you have not been tested after you took ANY of the vaccines, you could have Covid-19, be contagious, be feeling fine and have no idea you are infected and spreading the disease.

7. Just because a person feels fine now, that does not mean they will be feeling fine a year from now. That is why real vaccine trials go on for about 3 years, with the vaccine companies monitoring the health of the recipients. Certain conditions from the vaccines build up over a longer. of time or make pre-existing conditions worse. Some "adverse outcomes" or tragic side effects are not immediate and may take a while to do enough damage in the body to cause catastrophic harm.

8. Scientific research shows even if you had gotten Covid-19, according to Johns Hopkins University, 98.2% of Americans survive it anyway, without a vaccine

9. Science also shows that if you had gotten Covid-19, the antibodies in your system from Covid-19 would likely have caused stronger and longer protection against the strains, variants and/or mutations than the vaccine.

10. In Georgia only 10% of the population tested has been infected with Covid-19 in more than a year. That means 90% of Georgia is not infected. So that means you may not have ever gotten Covid-19 anyway. That number is according to the Georgia Department of Public Health on April 23, 2021.

11. Likewise, according to Johns Hopkins University as of April 23, 2021, only 10% of America over more than a year's time has been infected with Covid-19. That means that 90% of the United States has not been infected.

And while this number is based on estimates and testing, none of the medical agencies you trust have complained about nor discredited the numbers from Johns Hopkins University. So if you trust the news media, the FDA, CDC and HHS, you might as well trust the numbers that Johns Hopkins University is giving out because these agencies trust them.

12. In Georgia, according to the Georgia Department of Public Health, the black community has almost never been at the highest risk of death nor the highest number infected from Covid-19. Check the numbers for yourself on their website.

Most of you were deceived by the subtle and effective propaganda machine of lies sent through the media to you. Others of you took the vaccine out of fear. And others of you never bothered to ask what was in the vaccine they gave you nor to verify what they was saying as true.

13. If the vaccines were working like they said, the Covid-19 numbers would not be reaching the highest level since the pandemic began. If what the FDA, CDC and vaccine manufacturers said had been true, then the numbers should be way going down instead of up since over 100 million people have been vaccinated.

14. The vaccines are neither guaranteed to prevent infection nor re-infection. In fact, in many cases that leaked out, quite the opposite happened and people got COVID-19 after being vaccinated. Stop and think. They are lying to you.

15. If you had gotten Covid-19, there are and have been various medical treatments available from medical doctors all around the country who helped their patients recover. All without a vaccine. These medical treatments were available before the

vaccines and even now. In Georgia Piedmont Hospital, for example, has such treatments. But they were hidden from the public so you would think the vaccines were the only hope. That was never true.

When we haphazardly let others think for us or react out of fear, we let other people think and decide for us. But they will go on about their lives and some people who have taken the vaccines will have to deal with the decisions they let other people make them. And remember, sometimes Kool-Aid comes in a needle.

Every claim you have just read or heard can be proven within the data from the very regulatory agencies that have been pushing the vaccine. They didn't even bother to hide it well because they knew you would not likely find it and not likely believe it if you did. And for most people who are the "Zombies" the CDC and Department of Defense spoke of, both these agencies were right. If you want the proof of the claims we have made, go to [www.covid19exposed.net](http://www.covid19exposed.net) then click the red triangle on the website and listen. Or email us from the website for any specific evidence. We deal in facts, evidence and proof, not conspiracy theory!

There is a good reason vaccine trials take 3 years or more. That is because the vaccine and medical industries must observe the vaccinated guinea pigs for all that time to see what happens. So for 3 years from the time you took the vaccine, quite a few things could pop up and the vaccine industry knows it.

The bad news? You **are now a genetically modified human being filled with a combination of the virus that causes Covid-19, nanotechnology nano-particles and poisons such as polyethylene glycol, formaldehyde (used in embalming fluid), mercury and aluminum.** All because you took an experimental unapproved vaccine they convinced you would work better than the customized immune system in your body that has protected you for your entire life, including for a year when there was no vaccine. Before you say "that's not true", look at the proof we have. Before you say "oh well", let's see what happened over the next few years, generally the length of time for vaccine trials.

Those are the facts and again, every one of them can be proven right from inside the documents of the agencies you trusted for the vaccine. And you didn't even have to be a doctor to understand these documents because they were written in everyday language.

**Wise people would be smart to get tested twice to see if they developed**

**Covid-19 after taking the vaccine.** So while people are getting the vaccine and going on vacation, thinking everything is fine, it would be smart to get tested and see if the virus inside the vaccine you took actually reproduced Covid-19 in you. Click the yellow button on our home page then go through the entire website, especially the video evidence where you can hear medical doctors confirm what I have just told you. Then share the website and the truth with others.
